

## Voice, Ultrafast broadband and TV networks

### Statement concerning Choice of Service Providers on the OFNL Network for Business Customers

Date: 7<sup>th</sup> July 2021.

Open Fibre Networks Wholesale (trading as OFNL Wholesale) are passionate about providing choice and best value to businesses connected to its fibre network.

OFNL provides an 'Open Access' network infrastructure to enable choice of providers from which you can get your voice and data services. However, there is a requirement for Service Providers to contract with OFNL Wholesale to enable the delivery of their services over the OFNL network infrastructure.

The range of services available to business customers is dependent on the business requirements and OFNL Wholesale are more than happy to discuss those requirements to identify a suitable solution using OFNL Wholesale's wholesale services.

OFNL Wholesale deliver a variety of services over the fibre network at the development and range from single phone and broadband services for a small business, through to large business connections that require Layer 2 Ethernet connectivity with bandwidths from 10Mbps up to 1Gbps and multiple voice channels delivered by Session Initiation Protocol (SIP) trunks, from 2 channels up to 30 or more channels.

OFNL Wholesale will work with our list of contracted Service Providers to deliver services for business customers at a development. OFNL Wholesale are happy to agree a contract with a Service Provider who is not currently contracted to deliver services across the OFNL infrastructure if a business would like to use their preferred Service Provider. This will be dependent on this preferred Service Provider agreeing terms with OFNL Wholesale.

OFNL Wholesale has been very successful in attracting Service Providers to the network to deliver services to business clients and OFNL Wholesale has signed up the list of Service Providers to deliver these business services detailed on the next page

For further information please contact us during normal business hours using the following details below.
